

Uncompromised Protection, Unparalleled Solutions

Advancing innovations to protect
property, the environment and
most importantly – people.

Focusing on Your Needs, Protecting Your Interests

When you are protecting vital assets and people from around the world there is no room for compromise.

That's why Tyco Fire Protection Products provides an extraordinary level of protection.

Our products reflect the very latest in technology and innovation. Our people use these products to tailor solutions specific to our customers needs. Our whole focus is on our clients and their requirements.

Our customers include:

Nearly 3 million commercial, government and residential customers

More than 1 million fire fighters worldwide

90% of the top 50 oil and gas companies

80% of the worlds top 200 retailers

A majority of the Fortune 500 companies

Over 300 international airports

Over 200 hospitals

Over 100 major stadiums around the world

*Numbers based on internal company estimates

Whether you are protecting a city skyscraper, a major hotel, an industrial factory, an educational facility, a mine site, a tunnel, a hospital or maybe even a residential property, you need the peace of mind that your fire protection and mechanical piping solutions are in the hands of experts.

Whatever your objectives, whether it be protection of employees and assets, business continuity, exceeding regulatory safety standards or meeting corporate sustainability and zero harm policies, no other company has the experience, skills and technology to meet these objectives.

We have an unparalleled record of effective fire protection around the world. However, to achieve this takes significant resources.

Tyco Fire Protection Products' Footprint:

- // Over 4,600 employees
- // Trading in 190 countries
- // 49 distribution branches
- // 49 languages spoken
- // 26 manufacturing locations
- // One global leader in fire protection solutions

Tyco Fire Protection Products is a strategically aligned business unit of Tyco. At Tyco, we have over 3 million customers worldwide and the number continue to grow every year. Critical infrastructure components in many countries and municipalities have been designed, constructed, and are even managed by Tyco companies.

As part of our Global Resources, Tyco Fire Protection Products has a significant presence in Australia, New Zealand, and the Pacific region. We have extensive local expertise that understands local standards, building regulations, and the unique conditions our clients in this region face.

First Class Products World Class Brands

Tyco Fire Protection Products provides complete floor-to-ceiling solutions.

Our products include manual fire-fighting equipment, fire detection and suppression systems, extinguishing agents, sprinkler systems, valves, piping products, and fittings.

Chosen for proven performance, advanced design innovation and depth of customer support, Tyco Fire Protection Products' brands are your guarantee of all-encompassing protection, from industrial and commercial, to institutional and residential applications.

No matter how demanding your requirements and environment, we can combine individual products to produce a cost-effective and powerful fire protection solution to meet your needs. Our customers have the convenience - and peace of mind - that they are dealing with the number one manufacturer of fire protection products in the world.

Special Hazards Fire Suppression

Unique fire hazards require unique suppression solutions. We protect more industrial, commercial, institutional and residential facilities around the world than anyone. We design and manufacture high-performance products to effectively reduce the risk of injury, business downtime, and substantial equipment damage. This often calls for unique solutions. When partnering with Tyco Fire Protection Products, you will have access to the global Special Hazards leaders that are dependable and innovative to address your unique needs. **Brands in ANZ: ANSUL, CHEMGUARD, HYGGOOD, LPG, SABOFOAM, SKUM, WILLIAMS FIRE and HAZARD CONTROL.**

Water-based Fire Suppression

Tyco Fire Sprinkler Systems are built on a heritage that started in 1873 to protect the lives and property of people around the world through innovative technologies backed by in-depth technical expertise. Tyco products provide fire sprinkler installers, architects, engineers and owners with the industry's most complete line of residential and commercial solutions for protecting homes and buildings. With over 30 million sprinklers installed worldwide every year, we are the world's number 1 sprinkler supplier. **Brand in ANZ: TYCO FIRE PROTECTION PRODUCTS.**

Fire Detection Products

Tyco's heritage and experience in fire detection began with many years of product innovation through research and development. SIMPLEX and VIGILANT, the industry-leading fire detection systems are AS and NZS certified and include a wide range of life-safety products for fire detection, emergency communications, voice evacuation, security, and related solutions. With more than 220 years of combined experience, the resolute heritage continues today with technological innovation, research and development, and product excellence. **Brands in ANZ: SIMPLEX and VIGILANT.**

Mechanical Products

Tyco Mechanical Products offers a complete suite of grooved and non-grooved piping solutions for a full range of mechanical, HVAC, commercial, mining, institutional, and industrial applications. In Australia and New Zealand, the GRINNELL G-Fire represents a premium line of Fire grooved products while SHURJOINT offers unparalleled Mechanical piping solutions that provide contractors, engineers, and distributors faster and more cost-effective tools for joining pipe over traditional welding methods. **Brands in ANZ: GRINNELL and SHURJOINT.**

Bringing the benefits of specialised knowledge to our core markets.

Tyco Fire Protection Products is a distinctive provider to a number of key industries. We understand the unique challenges you face on a day-to-day basis. We have built solutions around these needs and we are acutely aware of the building regulations and standards required for each of these markets.

The Markets We Serve

Performance You Can Rely On

Our range of products are designed, engineered, configured and installed for optimum performance even in the most trying and harsh conditions.

They incorporate the very latest in fire protection technology and are meticulously tested and certified by independent authorities resulting in global approvals and certifications.

We manufacture to the highest quality standards to ensure the dependability of our products long after they are installed.

Tyco Fire Protection Products have been chosen to protect some of the world's most iconic and vital buildings. Our solutions are designed into schools, restaurants, offices, tunnels, commercial complexes, data centres, mine sites, power plants, onshore and offshore facilities. We protect the museums you visit and the hotels you sleep in. Our solutions are behind the scenes in the hangars that service the planes you fly on, and on the ships and in the refineries that supply oil to you.

Our record in protecting these vital assets is your guarantee.

Commitment to Quality & Customer Focus

Quality is inherent in every aspect of our business. Our products. Our people and culture. Our processes. Our support services. And most importantly our customer service.

We are in the business of protecting human life and assets. We recognise that this an enormous responsibility, therefore we simply cannot afford to compromise on quality.

Our Promise
We have a passion to protect what matters most.

Our Commitment to Quality

Quality research, design and flawless manufacturing have been central to Tyco's philosophy since the company was formed. Reliability and durability are engineered into every Tyco product. Rigorous procedures ensure accurate manufacturing and timely delivery to the customer.

We constantly monitor our quality management and always strive for continual improvement excellence.

Our Customer Focus

Our aim is to build long-term relationships with our customers working in a spirit of partnership with you. We believe that the best way to start any business relationship is to build a deep understanding of your needs so that we can use that

knowledge, our expertise and products to meet and exceed your expectations.

However, we know it's not enough to simply supply products and services, on time, and within specification. It's also about how we achieve this. How we work with you. How we communicate with you. How we respond to your enquiries.

We recognise that it takes passion and commitment to building lasting relationships of mutual benefit. We believe that if we provide you with a superior customer experience you will continue to trust us with your fire protection requirements well into the future.

Research and Development Centre in Christchurch, New Zealand

Championing Excellence

Customer Driven Research and Development

To maintain our position at the forefront of global fire protection Tyco Fire Protection Products invests millions of dollars and thousands of man-hours into research and development.

Our research and development is predominantly customer driven. That is, our customers are the architects of our future solutions. We constantly solicit feedback from you and develop products based on your needs and the rapidly changing environment.

Globally, Tyco has over 20 research and development facilities staffed by our passionate employees who have produced over 4,500 patents that are secured or pending.

Locally we have established a purpose-built Research and Development Centre of Excellence in Christchurch, New Zealand. This facility is home to a dedicated team of Research and Development Engineers, Product Managers and Technical Support staff. Together, they have developed and support the long-established VIGILANT range of fire detection products and are responsible for the regional adaption and support of the SIMPLEX range of products.

Tyco is committed to Environment, Health and Safety (EH&S) excellence.

At Tyco, we place a high value on people and environmental protection. We are committed to complying with EH&S laws and regulations wherever we operate around the world. We seek to conserve energy, water and raw materials, recycle and reduce waste. Our EH&S policy is the basis for our commitment to environment, health and safety programs. It reinforces our commitment to do our part in protecting the environment for future generations.

When it comes to employee safety and environmental protection, we can never settle for anything less than Zero Harm.

Tyco is committed to producing products and providing services to customers in a safe, responsible manner that respects the safety of our employees, the environment, our customers, shareholders, and the communities in which we operate.

We share a passion for advancing safety and security.

Tyco's diversity and culture is built on a foundation of four key values. These values shape how our employees interact with every stakeholder and with one another. Together, they drive our company forward. The values are:

Integrity - We demand of ourselves, and each other, the highest standards of individual and corporate integrity.

Excellence - We continually challenge each other to improve our products, our processes and ourselves.

Teamwork - We foster an environment that encourages innovation and creativity, and delivers results through collaboration.

Accountability - We honour the commitments we make and take personal responsibility for all actions and results.

At Tyco, we strive to advance safety by finding smarter ways to save lives, improve business, and protect where people live and work.

Discover today the benefits a single-source, floor-to-ceiling protection solutions provider can bring to you and your customers.

Working with Tyco means you get the right solution, developed by experts and supported by the resources of a committed fire and security industry leader.

Our Purpose

We advance safety and security by finding smarter ways to save lives, improve businesses and protect where people live and work.
