

QE20 UI & Display Extender Zone Label

When printing ensure Page Size is set to Actual Size on A4 in printing set-up to guarantee the label is printed scale 1:1. Each label should be 52mm wide x 122mm long.

Use of upper case text is recommended for zone name text.

Up to 28 characters can be used for each zone name text string. Too many large characters may cause the text string to exceed the allowable space, in which case a "+" sign will be visible.

MATERIAL: MATT WHITE 140 – 160gsm A4 PHOTOCOPY PAPER.
THIS IS A 5 UP MASTER.

PART NUMBER: LB0694 REV A, EDITABLE
DRAWING 1994–7A.
